

PRODUCTS **MEDICAL EQUIPMENT**

Reliable Quality to Meet Medical Needs

We contribute to human life and health through the pursuit of lasting quality control, safety, and reproducibility.

Exceptional Quality and Technological Capability to Meet Medical Equipment Needs

We are fully licensed to repair and manufacture medical equipment, and have an extensive track record of serving medical equipment manufacturers in Japan and overseas. Our services range from the management of demonstration equipment used in sales and equipment loaned to customers while their own equipment is being repaired, to carrying out maintenance inspections and repairs, and managing and storing consumables. Our exceptional quality management and technological capabilities enable us to provide services that satisfy our customers.

01 OVERVIEW OUR MEDICAL EQUIPMENT BUSINESS

■ Licensed Repair Categories

- Non-special-management category 2: Bio-phenomena measuring and monitoring systems
- Non-special-management category 3: Treatment and facility equipment
- Non-special-management category 4: Artificial organs
- Non-special-management category 5: Optical equipment
- Non-special-management category 6: Physical therapy equipment
- Non-special-management category 7: Dental equipment
- Non-special-management category 8: Specimen testing equipment
- Non-special-management category 9: Steel implements and home-use medical equipment

02 REPAIR SERVICE

■ Product Repairs

Failure diagnosis

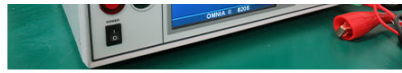

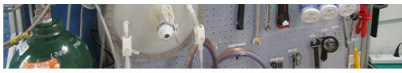

Our services include work to restore malfunctioning, damaged, degraded, or otherwise compromised parts to their original condition and function, as well as overhaul work to disassemble and inspect equipment regardless of whether it has exhibited any failure or other issue and remedy any problems found, for example by replacing degraded parts.

■ Period Maintenance Inspections

We work on equipment for which we've been requested to provide preventive maintenance service.

03 INSPECTIONS

■ Pre-shipment and Post-return Inspections

We perform pre-shipment and post-return inspections of demonstration equipment and loaner equipment furnished to customers for temporary use while their own equipment is being repaired.

■ Arrangement and Management of Demonstration and Loaner Equipment

We arrange shipment of demonstration and loaner equipment upon request and offer other related services, including inventory management and preventive maintenance.

04 WAREHOUSE AND DISTRIBUTION

■ Warehouse

Our warehouse stores customers' equipment, parts, and other supplies.

■ Distribution

We're conveniently located about 30 minutes from Kansai International Airport, and about 5 minutes from the nearest expressway interchange, allowing us to quickly ship demonstration, loaner, and repaired equipment.

05 IMPORTS

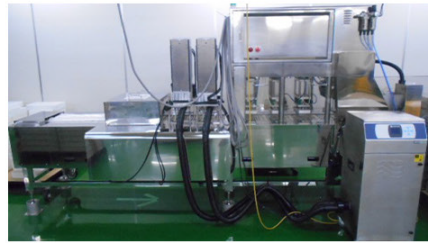

Product imports and part procurement

We import products and parts from overseas in order to maintain an environment that allows us to perform work and ship equipment to customers quickly.

06 PRODUCT PACKAGING (Primary and secondary packaging)

We package products, starting with intermediate products, in cases and other packaging.

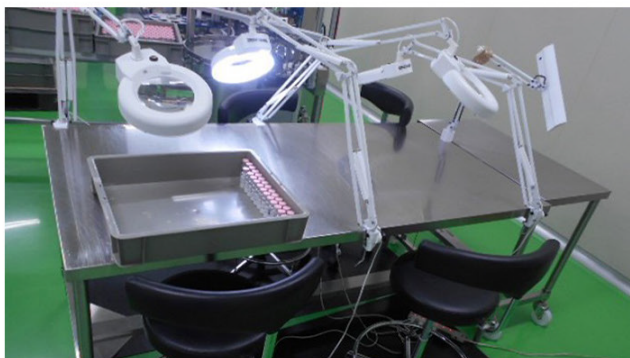

07 LABELING

We label packaging and cases for products, starting with intermediate products.

08 INSPECTIONS

We inspect products for appearance, dirt, incomplete lots, peeling tape, and other defects.
